

BIOLOGY (BIO)

BIO-105: Human Anatomy & Physiology I (4 Credits)

Co-requisite(s): BIO-105L is required.

A systematic study of the gross and microscopic anatomy of the human body and the function of its parts are explored in this course. Laboratory work includes dissections, microscopic examinations of structures and experiments in physiology. This sequence is for those in nursing. It is not appropriate, in and of itself, for those considering professional schools or graduate school in anatomy, physiology or development.

Fulfills Core Requirement in Natural Sciences.

Theme: Engaging Creative, Aesthetic and Spiritual Experience.

Lab Fee: \$150.00
